

PROBLEM STATEMENT

- "Eduitive" is a dynamic e-learning app.
- Addressing the challenges of diverse curricula, teaching styles, and complex examination systems in Pakistan.
- Bridges the gap between traditional learning and modern resources.

OBJECTIVE

- Create chatbot for context-specific guidance in Pakistani curricula.
- Offer 24/7 personalized mentorship with customized guidance.
- Enable user-contributed educational videos fostering collaborative learning.
- Facilitate self-paced learning and reducing teacher reliance.
- Create self-assessment tools, reducing external exams.

FEATURES

CROWD SOURCING

CHAT BOT

ONLINE VIDEO LECTURES

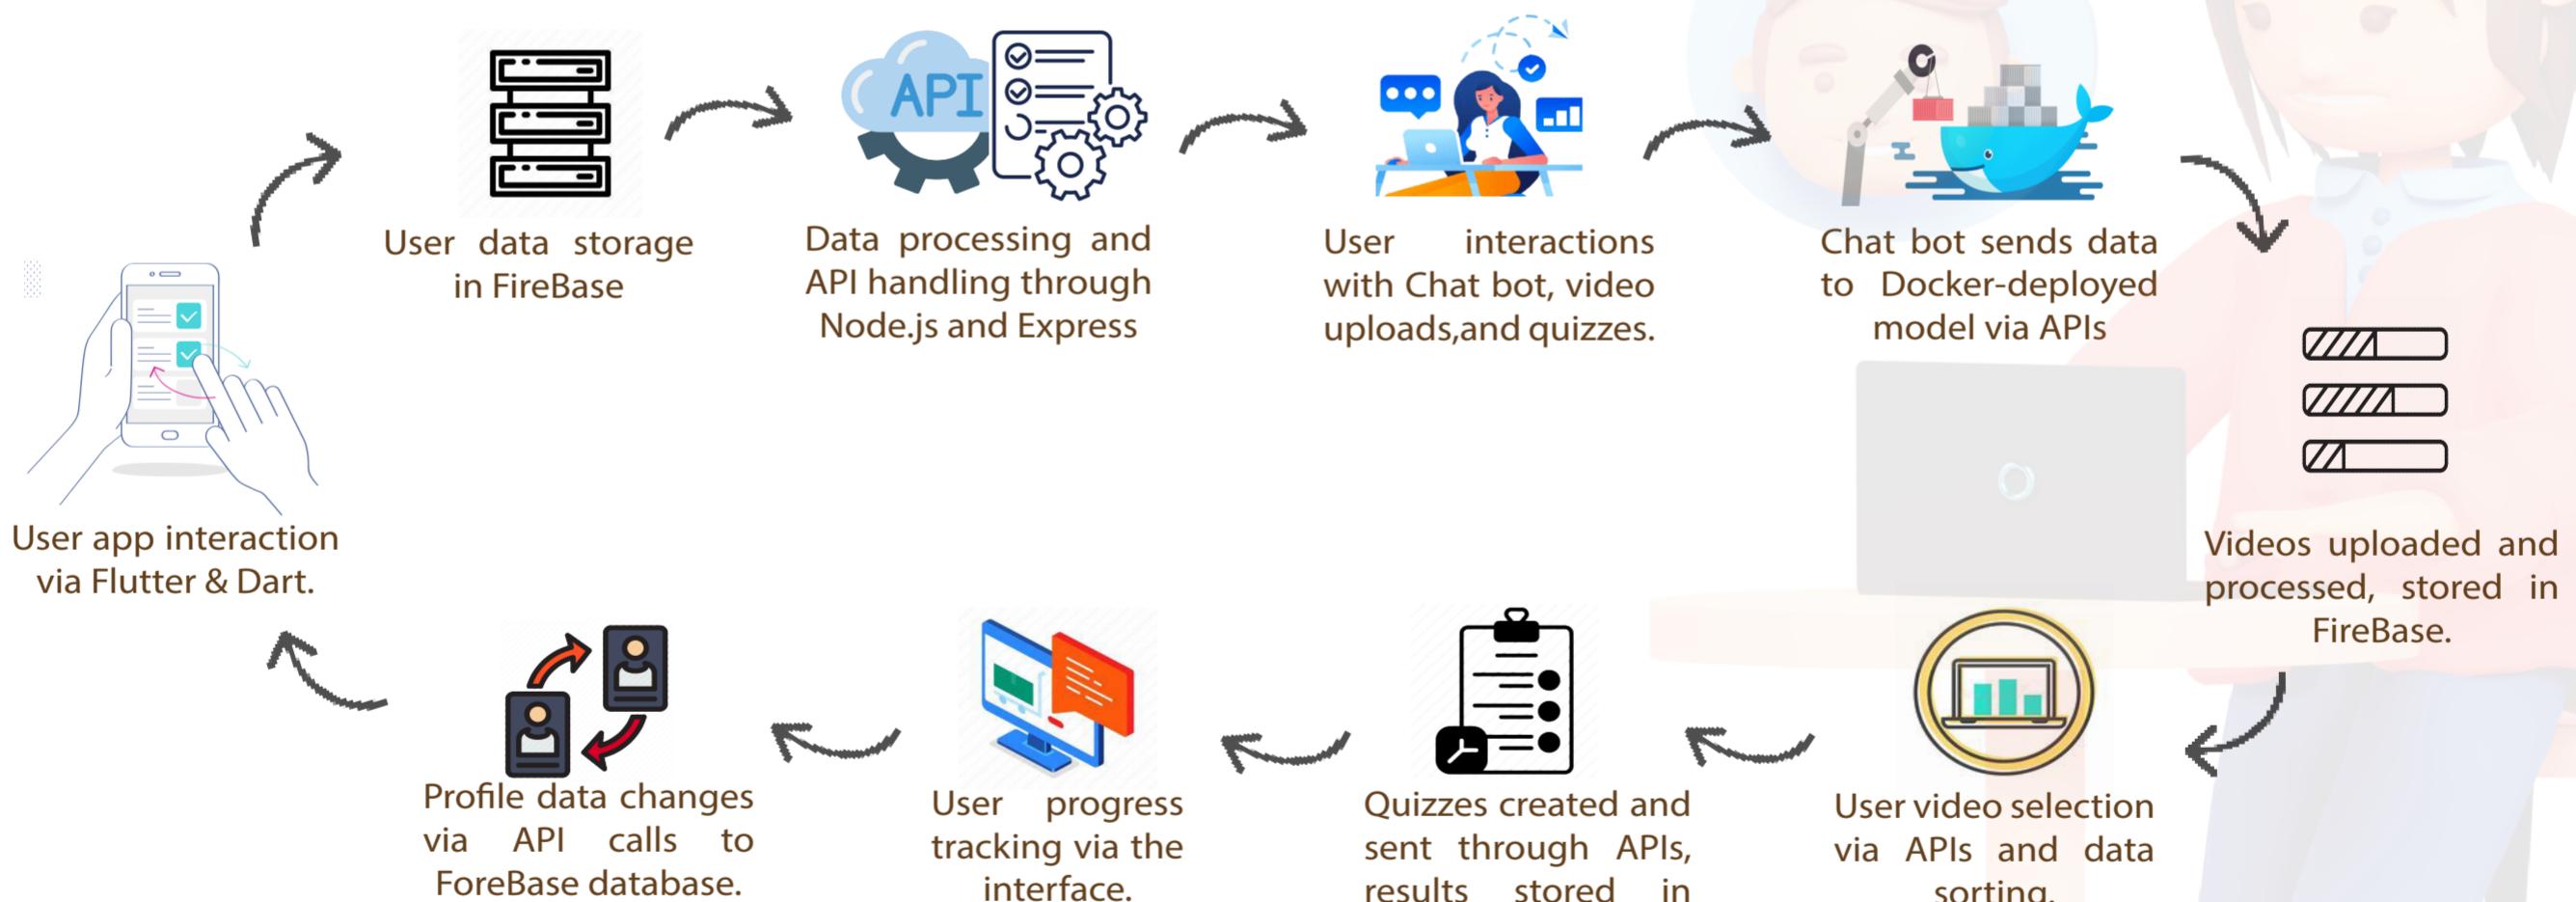

ONLINE QUIZZES

SOLUTION

Focusing on individualized learning, personalized mentorship, self assessments tools and crowd-sourced resources, our solution aims to bridge the gap between existing e-learning platforms and the specific challenges posed by Pakistani boards and curricula.

METHODOLOGY

CONCLUSION

Eduitive has the potential to revolutionize education in Pakistan. It's a game-changer that empowers students and reduces their dependence on traditional teaching and examinations.
